

Lesson: Working with layers

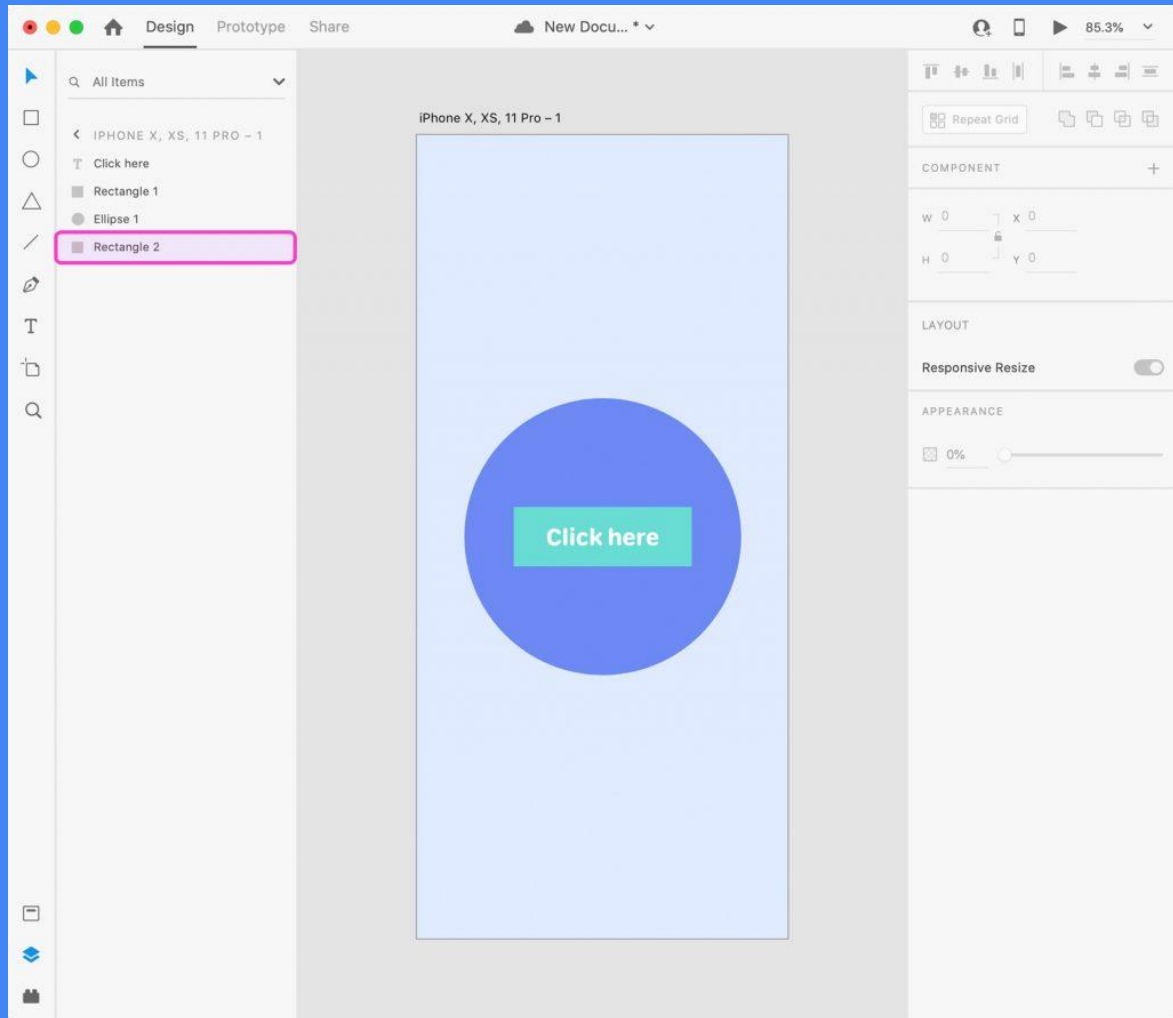

Layers

Layers are a fundamental component of Adobe XD. Every object you create with Adobe XD is a layer.

Layers are stacked on top of each other, and their visibility in your artboards is defined by their position in the layers panel on the left side of the screen (If this panel is not visible, you can show it by clicking on the layer panel icon in the left toolbar, or by using the shortcut: **CMD + Y** (Mac) & **CTRL + Y** (Win)).

Layers

Homework

1. Create multiple layers.
2. Differentiate all the layers.
